ABOUT ME

A fresh IT graduate with practical experience across different areas of information technology, including software testing, automation, and programming. Skilled in problem-solving, adaptable to new tools and technologies, and eager to grow in IT roles ranging from software development to system support. Strong team player with the ability to collaborate in Agile environments and quickly learn new skills.

SKILLS

Programming and Development :

- HTML, CSS, Java
- SQL
- C
- C++
- Python
- MIT App Inventor

Automation & Testing:

- Manual & Regression Testing
- Selenium Automation (Python, WebDriver)
- Test Documentation
- Jira

Software & Tools:

- Microsoft Office
- Canva
- Google Workspace

Soft Skills:

- Attention to details
- Willingness to learn
- Team Collaboration

EDUCATION BACKGROUND

Multimedia University (MMU), Cyberjaya

Diploma in Information Technolgy (2023 – 2025)
CGPA: **3.79**

Projects:

- **Rat Smash Game (MIT App Inventor)**
  A two-player mobile game where players have to smash as many rats as they can within a minute and the player with the highest score will be counted as the winner

- **Sport Equipment Rental System (C++)**
  A system to let customers rent sport equipment according to their needed sport categories. Built features to calculate rental prices dynamically according to duration and equipment type.

- **Movie Review Website (HTML, CSS, Java)**
  An Interactive platform for movie enthusiasts to browse, review, and rate films, watch trailers, view descriptions, and manage personal favourites and watchlists, all in one website.

WORK EXPERIENCE

QA Testing Intern (Entomo Digital Sdn. Bhd.)

Entomo Digital Sdn. Bhd. | July 2025 – October 2025

- Delivered manual and regression testing across DEV, UAT, and LIVE, ensuring smooth and stable product releases.
- Built and enhanced Selenium automation scripts in Python, cutting repetitive test time and boosting accuracy.
- Created and maintained test documentation to support QA workflows and ensure traceability.
- Utilized Jira to view user stories, track status, and monitor sprint progress for better alignment with the Agile team.
- Collaborated with cross-functional teams in Malaysia and India, ensuring effective Agile sprint delivery across time zones.
- Gained hands-on experience in the Sprint framework, actively participating in sprint planning, stand-ups, reviews, and retrospectives.
- Partnered with developers to identify root causes and validate fixes, reducing post-release defects.

Project:

- **MyVAS Automation (Selenium, Python)**
  Developed and executed automated test scripts for the MyVAS system to support regression testing, bug verification, and workflow validation across DEV, UAT, and LIVE environments.

LANGUAGES

- Malay (Native)
- English (Fluent)
